Help drive your businesses performance with practical noise management training

We are a Registered Training Organisation offering practical, competency-based Australian Skills Quality Authority (ASQA) accredited courses ‘Noise monitoring and Evaluation’ and ‘Coordinate noise management activities’ for attainment of industry-wide qualifications.

Some benefits of noise management training:
- Improve your skills
- Minimise the risk of litigation
- Reduce insurance premiums

Specialised training is offered at two levels under the Australian Qualifications Framework: Level 5 (diploma) for technical staff and Level 8 (post graduate certificate) for staff professionally responsible for evaluating noise and noise management.

Other modules are available through face-to-face training.

Contact us now!

Modules available for online study:

Module 1
Noise evaluation in practice

Module 2
Legislation, standards and guidelines

Module 3
Basic acoustic principles

Module 4
Sound and noise measurements

Module 5
Noise monitoring instruments

Module 6
Sound propagation and noise mapping
